Binny

The Disposable Sanitary Bin for Everyone

Binny™ is a flat-packed, disposable sanitary bin designed for the safe, discreet, and eco-friendly disposal of sanitary waste. Suitable for organisations of all sizes—from sole traders to major employers—it offers a practical, cost-effective alternative to traditional sanitary bin services, delivering both cost savings and environmental benefits.

With built-in Biomaster antimicrobial product protection, Binny™ remains hygienic throughout its entire lifetime, ensuring a safe and sanitary solution for personal waste disposal.

Where is it used?

Community spaces, schools, high street businesses, offices & more!

Transforming Waste Management

Say goodbye to expensive sanitary bin contracts

All organisations should provide sanitary bins. Binny™ offers a **convenient, self-managed solution** that enhances facilities while cutting costs and **reducing environmental impact.**

Unlike contractors who generate a high carbon footprint with frequent vehicle trips, Binny™ eliminates these emissions entirely.

Traditional sanitary bins are emptied on rigid schedules, often before they're full. With Binny™, replacements happen only when needed, allowing bins to remain in place for up to 12 months **saving time, money, and resources.**

Practical, Discreet Disposal with Water Resistant Coating

Binny™ sanitary bins feature a 12-litre capacity with a water resistant coating that integrates with your existing cleaning protocols.

Easy Disposal

When the Binny™ is ready to be replaced, in-house cleaning operatives can easily dispose of it. The disposal method depends on the volume of offensive waste collected:

Under 7kg per collection: Binny™ can be placed in standard black bin waste (suitable for 99% of UK organisations).

Over 7kg per collection: Binny™ should be disposed of via the offensive waste collection stream.

Each Binny™ bin weighs only around 1kg when full, providing an easy and convenient solution for most organisations.

Effective Disposal: Provides a safe and efficient solution for all sanitary and personal waste.

Full Compliance: Meets all relevant legislation, including HSE, EA, and DOH standards.

Eco-Friendly: Reduces your sanitary bin carbon footprint, supporting environmental sustainability.

Cost Savings: Eliminates the need for expensive sanitary bin waste contracts. Binny™ is classified as a consumable, requiring no capital investment.

Enhanced Facilities: Improves the sustainability of often-overlooked toilet facilities.

Advanced Odour Control: Features inbuilt antimicrobial product protection and odour control, fully conforming to ISO20743:2013 standards.

Eco-Friendly Design: Manufactured from approximately 75% recycled fibres and 25% sustainable sources.

"As a large NHS Trust, I have extensive knowledge regarding waste and sanitary waste is actually classed as 'offensive waste.' Legislation concerning waste is often mis-used to place pressure on organisations to use sanitary bin contractors but there is no legal requirement for any organisation to use these contractors.

We have moved away from sanitary contractors and now use Binny™ disposable sanitary bins in all our toilets. I would encourage other organisations to review their use of contracts as Binny™ disposable sanitary bins have provided us with many advantages including carbon footprint reduction and improvement in service quality."

Paul Adams
Facilities Officer
Directorate of Capital Planning and Facilities, South Essex Partnership University NHS Foundation Trust
